

# PAKIHI TRACK RIDERS: PLEASE READ

**Pakihi Track is an advanced (grade 4) mountain biking adventure. This track suits mountain bikers with good off-road riding skills and considerable riding experience.**

Regular rockfalls

Many steep drops beside a narrow track

Do not ride during or soon after a storm

## **Not for you?**

Ride Motu Road Trail instead.

## **Make sure you have the skills for Pakihi Track**

**Pakihi Track suits mountain bikers with good off-road riding skills and considerable riding experience.**

You can expect:

- Narrow track with steep drops next to it
- Obstacles like fallen trees and rocks.

You need to have the skills to manage accurate line choice and to control braking on loose surfaces.

Respect the track, ride within your abilities. All riders will need to walk some bits.

### **Do not ride Pakihi Track during/soon after a storm**

Slips, falling rocks and falling trees are much more likely, so we strongly recommend not using the track at these times.

Find trail conditions at [www.motutrails.co.nz](http://www.motutrails.co.nz) or [info@motutrails.co.nz](mailto:info@motutrails.co.nz)

### **Follow all safety signs and carry a distress beacon**

Signs show hazards and walk zones. There are often new slips, fallen rocks and fallen trees, which won't have signs.

There is no mobile phone coverage on Pakihi Track, so carry a distress beacon.

---

### **Motu Road Trail**

Motu Road is a great alternative trip for intermediate (grade 3) riders. It is significantly less technical, but still has fantastic views and plenty of challenge.
